

HPLD

**HORIZONTAL POINT TO POINT
LOCKDOWEL INSERTER**

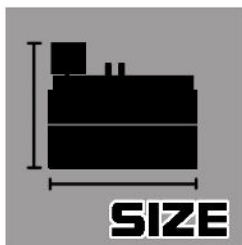

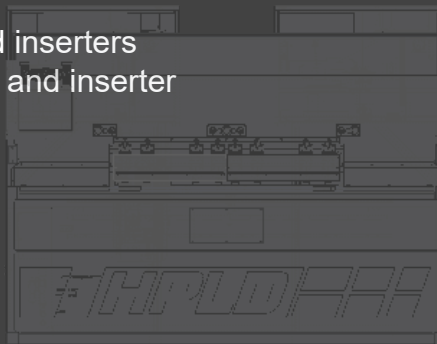

The HPLD is a horizontal point to point Lockdowel inserting machine. This machine will insert H-clips, Channel Locks and Spring Pins with ease. Using CNC control, this machine positions the drilling spindle to bore holes and insert the Lockdowel hardware. Using the HPLD will allow you to produce three times as much product without needing more employees. There's no need for glue or clamping with the HPLD and Lockdowel system. Lockdowels help reduce assembly time by 80% or more. Putting together cases, cabinets and furniture should take minutes, not hours. Cabinets built with EClips are SEFA 8 tested and passed. They are in compliance with AWI standards. You also have the ability to link the HPLD through Cabinet Vision's screen-to-machine software.

Standard Features:

- CNC X-Axis
- 15" Touch Screen
- 4 Work Zones
- 3 HP Direct Drive Routing Spindle
- Digital Readouts for height and depth
- 49" Work Area
- Lockdowel Eclips, feeders and inserters
- Lockdowel Spring Pin, feeder and inserter

Options:

- 96" Work Area
- Laser Part Measuring
- Barcode Reader
- Servo Controlled Y and Z Axis
- Wooden Dowel Insertion Unit
